

Signage Catalogue **by Leander**

The following pages illustrate some of the fingerarm, column and finial casting designs that we've built up since 1874.

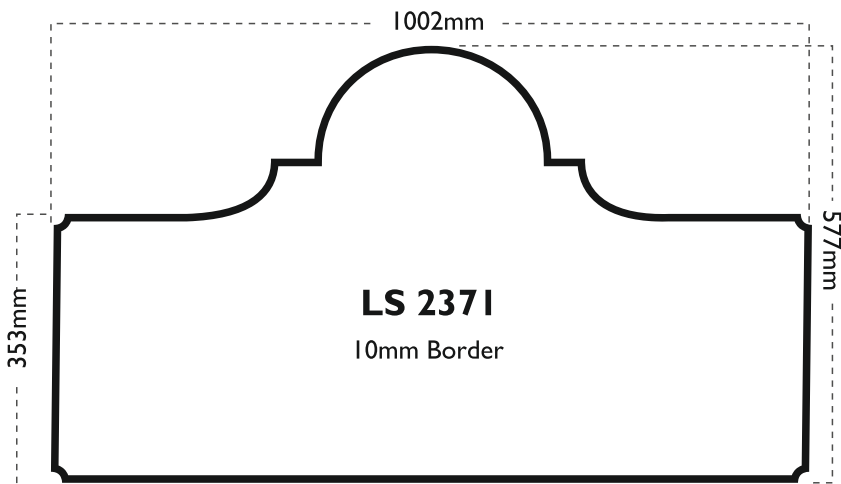

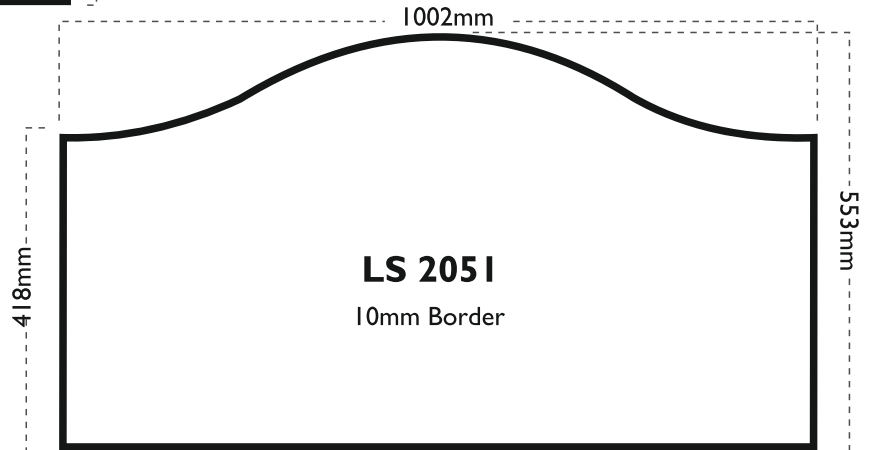

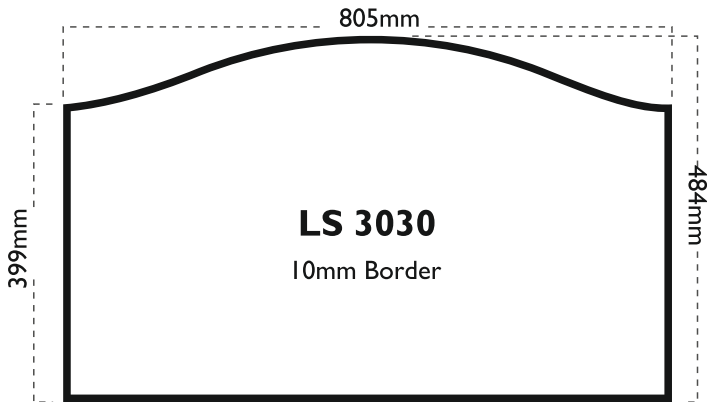

Illustrated within this catalogue are some of the hundred's of patterns that we have for signpost & fingerpost fingers. The designs range from the 1920's to the present day.

Please contact us if you are trying to match any existing cast finger, column or finial design - we may already have a pattern!
