

Outdoor Noticeboards

SALES / ESTIMATING GUIDE

Our Aim

To understand and identify the customer's required configuration quickly – providing accurate quotations with minimal additional input.

Consider these questions first

- What display area / paper sizes are required?
- Wall Mounted or Post Mounted?
- How many cabinets or doors?
- Traditional/heritage or contemporary?
- Post-mounted or wall-mounted?
- Header &/or Footer required?
- Header/Footer wording, logo or crest?
- Colour?
- Quantity?
- Delivery only or installation?
- Where is the project?

Standard configuration path

SIZE → CABINET / DOORS → STYLE → MOUNTING → HEADER → DECORATIVE OPTIONS → COLOUR → INSTALLATION

KEY DISTINCTION

A NOTICEBOARD contains information intended to be changed regularly. If the customer mainly wants a permanent map, heritage story, visitor information or tactile display, move the enquiry to Interpretation Displays & Lecterns.

Useful product rules

- Traditional designs can use alternative finials, collars and column bases from our standard product range.
- Header & footer panels can include wording and, where appropriate, logos/crests (either Vinyl Transfer, 2D Raised Relief or Fully sculpted).
- Different cabinet door configurations and pinboard options are available.
- Printed information/interpretation panels can be combined with noticeboards where required.
- Standard RAL colours are available; bespoke colour references can be specified.

Information required from the Client to issue an accurate quotation

- Customer/contact and delivery/project location
- Quantity and approximate size
- Cabinet/display arrangement
- Mounting arrangement
- Header or footer requirement
- Finish/colour
- Delivery / installation scope
- Any artwork, logo or crest requirement
